

National and/or regional datasets including users of NHS Hospital services (de-identified data)

Dataset	Description	Purpose	Privacy Notice
Hospital Episode Statistics (HES)	De-identified* hospital records including inpatient, outpatient and accident & emergency data for the whole of England.	Quantitative research analysis of the quality of care delivered by the NHS, funding pressures and productivity.	HES Fair Processing Notice
Local Hospital SUS data	De-identified* hospital records including inpatient, outpatient and accident & emergency data	Quantitative research analysis to evaluate local schemes to deliver improved care for complex cases	
Linked Hospital Episode Statistics (HES)	De-identified* HES data (as above) linked to Age UK service records.	Quantitative research analysis to see how well Age UK's Integrated Care Programme works in reducing the need for hospital care.	Age UK Website
Linked Hospital Episode Statistics (HES)	De-identified* HES data (as above) linked to Royal Voluntary Service (RVS) records.	Quantitative research analysis to see how well the Royal Voluntary Service Home from Hospital scheme in Leicester works in reducing the need for hospital care.	RVS Website
Office of National Statistics (ONS)	De-identified* mortality data linked to HES.	Quantitative research analysis to enable the design of better hospital services for older people, particularly those people most at risk of an unplanned admission into hospital or long lengths of stay in hospital.	Southampton Hospitals Southampton University Leicester Hospitals Leicester University Nottingham Newcastle
Patient Reported Outcome Measures (PROMs) Data	De-identified* data linked to HES.		

* this data has been de-identified (pseudonymised) by NHS Digital i.e. names, address etc. removed and assigned a unique reference/pseudonym that does not identify the individual.

Please note that for the patient information we hold that is de-identified/pseudonymised we are unable to provide a copy of your data in response to a subject access request, or apply your right to rectification, erasure or to restrict processing. This is because we are not in a position to identify individuals or their particular records. Individuals wishing to apply these rights or withdraw consent previously provided should contact NHS Digital or the relevant study partner as described in the project specific fair processing notice. Where the processing is based on consent the relevant study partners will, at your request, either provide additional information enabling you and/or your records held by the Nuffield Trust to be identified and removed or remove your records from future datasets released for research purposes. For more information on pseudonymised data, and what that means for individual's rights, please see opt out information on the [NHS Digital website](#) and the Information Commissioner's Office's [Anonymisation Code of Practice](#).
